PROFILE

I am driven and ambitious undergraduate student of Computer Systems Engineering with strong analytical and programming skills and the ability to learn fast and excel in a team. I am seeking an opportunity to learn and build experience in artificial intelligence, cyber security, deep learning or software engineering.

EDUCATION

Queen Mary University of London | 2020 – 2023 June
Bachelor of Science in Computer Systems Engineering

Worth School, Crawley | 2013 – 2020 | Academic Scholar

A Levels

- Chemistry (A)
- Biology (A)
- Mathematics (B)

GCSE

9 GCSE grades (A* – C) including:
Mathematics (A*), Chemistry (A*), Biology (A*)
Physics (A), RE (A), English Language (B)

WORK EXPERIENCE

Final Year Project May 2023
Spectrum Sensing Using Deep Learning

- Applied deep learning tools and techniques to analyse and propose solution to the data communications problem of finding free radio frequency for transmission, exacerbated by the increasing demand for wireless services and devices

Dell
Intern **/ Summer 2022**

- Wrote/programmed games and applications for new onboarding hires
- Wrote biweekly cyber security newsletter
- Learnt Power Bi to create visuals of data for analysis

Security Research Labs (SRLabs - provider of cyber security consultancy and cutting-edge research to some of the largest global firms)
Intern **/ Summer 2021**

- Used bash scripting to map services running on ports against hackers IP addresses
- Carry out investigations on suspicious services and IP addresses
- Undertake basic hacking of machines using the Hackthebox platform

Fiverr
Game Developer / **School Holiday 2017 - 2020**

- Wrote online games using various languages such as Java and Unreal Engine for sale/skills development
- Worked remotely with clients to write games, account creation and login systems for a fee as part of a team

CORE SKILLS

IT Skills

- C and C++
- Java
- Unreal Engine
- Python
- JavaScript and CSS
- Vue and React

Soft Skills

- Entrepreneurial
- Teamwork
- Analytical
- Communication
- Web design
